The Paradox of "Just War" in Rousseau's Theory of Interstate Relations
BACHOFEN, BLAISE. *The American Political Science Review* 109.2 (May 2015): 314-325.
[Show highlighting](#)

Abstract (summary) Translate

In the Social Contract, Rousseau declares that he has given up the idea of discussing the "external relations" of states. Yet numerous texts--including a recently reconstituted work about the law of war--show that he thought very seriously about the question of the nature and origin of war and of the possibility of making war subject to the rule of law. Rousseau, in contrast to Hobbes, links war's appearance to that of the sovereign states; the state of war is therefore the necessary result of international relations. Moreover, he considers the international law as chimerical. How can he then conceive a non-utopian theory of "just war"? My hypothesis is that his conception of the law of war is deduced from principles of internal political law and arises from pragmatic necessity. The state that discredits itself in its manner of waging war weakens itself while believing that it is reinforcing itself.

Firestorm and dry ice: The cinema of Vincent Ward

Wilmington, Michael. **Film Comment** 29.3 (May 1993): 51.

[Show highlighting](#)

[Full text](#) [Full text - PDF](#) [Abstract/Details](#)

Abstract [Translate](#)

The filmmaking of Vincent Ward is discussed. Critics are sharply divided in their opinions of Ward, mainly because he works so slowly that he does not have many credits to his name.

Full Text [Translate](#) | [Turn on search term navigation](#)

I come from a fairly isolated place. When you live in New Zealand you're very conscious of the rawness of the environment. If you move somewhere else—it's a shock. That went a step further when I entered into the Maori community ...where you had a whole group of people, atypical, shut away—who really didn't want anything much to do with the outside world. A lot of people who didn't speak English; a lot of mentally handicapped; a lot of hunters all [of whom] still felt very strongly about the Land Wars of the last century....

That affected me very much.—Vincent Ward

New Zealand's Vincent Ward is the kind of filmmaker who wears his art on his sleeve—and his heart just under it—and that make him an open target. Also more interesting, provocative. He divides critic sharply, and perhaps it's only because his output has been relatively modest—three features, one featurette, and a documentary in 15 years—that our overall vision of him remains a little misty.

Ward works slowly. That first featurette, *State of Siege*, a stunning effort for a 21-year-old, appeared in 1978. His poignant documentary on the Maori, *In Spring, One Plant Alone*, came out in 1980. Thereafter he's managed a feature every four years or so: *Vigil* ('84), *The Navigator* ('88), and the current *Map of the Human Heart* ('93). His partial writer's credit on *Alien* sup 3, which he prepared and then ceded to David Fincher after disputes with producer Walter Hill, stands as a teasing side-trip.

Wildcards and truncation

You can use wildcards and truncation when you're looking for documents that contain spelling variants, or words that begin with the same character string.

Character	Description	Example
?	Wildcard character - used to replace any single character , either inside or at the right end of a word. Multiple wildcards can be used to represent multiple characters.	nurse? Finds: nurses, nursed, but not nurse sm?th Finds: smith and smyth ad??? Finds: added, adult, adopt
*	<p>Truncation character (*) - retrieves variations of the search term. Use the truncation character at the beginning (left-hand truncation), the end (right-hand truncation) or in the middle of search terms. Each truncated word can return up to 500 word variations.</p> <p>Standard truncation (*) retrieves variations on the search term, replacing up to 10 characters.</p> <p>Defined truncation ([*n] or \$n) replaces up to the number of characters specified, for example [*50]. The maximum number of characters that can be entered is 125.</p>	nurse* Finds: nurse, nurses, nursed colo*r Finds: colour, color *old Finds: told, household, bold [*5]beat Finds: upbeat, downbeat, offbeat, heartbeat

- نماد * جایگزین صفر، یک یا چند کاراکتر می شود و نماد ؟ جایگزین یک کاراکتر می شود. به عنوان مثال

analy?e کلمات analyze یا analyse را بازیابی می کند. *Behave کلمات behave, behavior,

behavior, behavioural, behaviourism, ... را بازیابی می کند. نماد ؟ در اول کلمات قابل استفاده نیست.

The screenshot shows the ProQuest website interface. At the top, the ProQuest logo is on the left, and navigation icons (headphones, calendar, user profile, and help) are on the right. Below the header, a navigation bar contains links for 'Basic Search', 'Advanced Search', 'Publications', 'Browse' (which is underlined), and 'Databases (5)'. The main content area is titled 'Browse Topics & Featured Content'. Under this title, there are two main categories: 'Dissertations & Theses' and 'Health & Medicine'. Under 'Dissertations & Theses', there is a link to 'Dissertations and Theses'. Under 'Health & Medicine', there are two expandable sections: 'Competency and Training Resources' and 'Study Paths'. The 'Competency and Training Resources' section is expanded, showing a list item 'Video Training Programs'. The 'Study Paths' section is also expanded, showing two list items: 'Practical Nursing (US)' and 'Registered Nursing (US)'.
